IHAM

HEALTH EDUCATION AND EXEMPTION FROM INSTRUCTION

Consistent with Department of Education requirements, health and physical education, including instruction about parts of the body, reproduction, and related topics, will be included in the instructional program.

Instruction must be appropriate to grade level, course of study, and development of students and must occur in a systematic manner. The Superintendent will require that faculty members who present this instruction receive continuing in-service training, which includes appropriate teaching strategies and techniques.

Parents/guardians will have the right to inspect health and physical instruction materials which will be made reasonably accessible to parents/guardians and others to the extent practicable.

Parents and legal guardians shall be notified by e-mail, other written means, website/social media postings or phone call, not less than two (2) weeks in advance of use of the curriculum course material to be used for instruction of human sexuality or human sexual education, that the material is available for inspection at the school. The notice will identify and provide contact information for the member of staff or faculty whom a parent or guardian should contact to arrange an opportunity to inspect the curriculum course material.

Parents/guardians who wish to review or inspect health and physical education materials may arrange a meeting with the Principal to review the materials.

Opt-Out Procedure and Form

Parents/guardians, or students over eighteen years of age, who do not want their child to participate in a particular unit of health or sex education instruction for any reason, are allowed to have their child opt-out of such instruction.

Parents/guardians who wish to have their child opt-out of such instruction are required to complete the district opt-out form and state the particular unit of curriculum in which the student is not to participate. Any student who is exempted by request of the parent/guardian under this policy may be given an alternative assignment sufficient to meet state requirements for health education. The alternative assignment will be provided by the health or physical education teacher in conjunction with the Principal.

Parents/guardians who do not want their child to participate in a particular unit of health or physical education must complete a Health or Physical Education Opt-Out Form (IHAM-R).

Opt-Out Forms are available from either the health education teacher or the Principal or District website policy section.

Opt-out requests must be submitted annually and are valid only for the school year in which they are submitted.

Current GSD policy for review to confirm compliance with RSA 186 that was revised July 2020 to add language distinguishing parental opt-out of health education based on religious reasons.

IHAM

In accordance with the federal Protection of Pupil Rights statute, as a School District that receives federal Department of Education funds, the Superintendent shall develop procedures to allow parent/guardian of a student to inspect any instructional material used as part of the educational curriculum for the student. The procedures will provide reasonable access to instructional material within a reasonable period of time after the request is received.

PART-TIME AND SUBSTITUTE PROFESSIONAL STAFF EMPLOYMENT

The Superintendent shall maintain a list of qualified substitute teachers who may be called on to replace regular teachers who are absent. Such a list shall be filed with the principal of each school.

The Absence Management system will call teachers on the substitute list for the grades and/or subjects for which they are listed. A teacher whose name does not appear on the substitute list may not be employed in the District except when specifically approved by the Superintendent. Principals will be responsible for seeing that the work of the substitute is as effective as possible and will provide him/her with a planned instructional program. The Superintendent, in conjunction with the Assistant Principals, will conduct an annual orientation of substitute teachers prior to opening of school.

SUBSTITUTES PAY

The rate of pay for a substitute shall be set by the School Board and be subject to periodic review.

REGULATIONS CONCERNING SUBSTITUTES

1. Substitutes must hold a high school diploma or have experience at the college level, or some experience working with children.
2. College undergraduates may be assigned to the substitute list for GES and GMS. Student teachers assigned in Gilford classrooms may substitute only in the classroom of their supervising teacher.
3. A student teacher who is substituting will be paid according to the Substitute Handbook.
4. Substitute teachers must complete a criminal record check, which will be paid for by the Gilford School District.

PER DIEM RATES FOR SUBSTITUTE TEACHERS

The following guidelines will be utilized in the calculation of substitute teacher wage/benefits.

<u>TERM</u>	<u>PER DIEM RATE</u>
Up to ten (10) days in same assignment or any number of days in various assignments	1) District substitute Rate: <u>\$105.00</u> 2) Licensed Nurse substitute Rate: Bachelor entry level per diem.
Long Term Substitute: 11-89 consecutive days in same assignment	1) Entry level annual salary divided by 186, to be effective on the 11 th consecutive day
Permanent Substitute: 90 Consecutive days or more in the same assignment	1. Actual annual salary that would be earned by the substituting teacher in a contract assignment divided by 186. 2. Five sick days 3. Listed benefits should be consistent with the negotiated agreement. (Pro rate 1/2 time.)

If at the time of the assignment, it is known that it will be eleven (11) days or longer, the higher applicable rate may be paid as of the first day. Given unusual circumstances, modifications may be made at the discretion of the superintendent of schools.

Additional Information

Certified teachers will be hired as “long term substitutes” or “permanent substitutes.” In cases where teachers are not certified, the school district shall request “permission to employ” from the N.H. DOE

Long term and permanent substitutes will receive a letter of understanding regarding their responsibilities.

COMMUNICABLE & INFECTIOUS DISEASES

A. POLICY:

Students and employees of the District are expected to attend the schools of the district without being infected with serious communicable diseases. Nonetheless, the Board recognizes that staff, students, volunteers and others may come in contact with bloodborne pathogens, viruses and other communicable diseases during the school day or school sponsored activities, or may carry those pathogens, viruses and diseases unknowingly into the school community. The Board adopts this policy as a means to minimize risk and respond to these health concerns while respecting the rights of all students and employees, including those who are so infected.

As described in Board policy JLCG, RSA 200:39 permits the exclusion from school of students who exhibit symptoms of contagion, or are a hazard to him/herself or others. As provided in this policy, determinations as to inclusion or exclusion of students or employees with communicable diseases from school will take into account the educational implications for the student and others with whom he or she comes into contact, recommendations from the New Hampshire Department of Health and Human Services (“NHDHHS”), the New Hampshire Department of Education, and the United States Public Health Services Centers for Disease Control (“CDC”). Diseases which will implicate this policy, include, but are not necessarily limited to, HSV related diseases such as Chickenpox, Shingles, Hepatitis B, and Infectious Mononucleosis, Acquired Immune Deficiency Syndrome (AIDS), Cytomegalovirus (CMV), or Herpes Simplex Virus (HSV), and other diseases which are from time-to-time identified by public health agencies such as the CDC and NHDHHS.

Any student or staff member found to be infected with a communicable disease that may bear risk of transmission will be excluded from school until that individual's primary care physician or other medical personnel indicates that the individual does not bear the risk of transmitting the communicable disease and provides medical clearance.

1. Students.

It is the policy of the District that students with communicable diseases should not be excluded from attending school in their regular classrooms so long as their attendance results in a situation where the risk of transmission of illness to students or employees of the School District, or hazard to themselves, is negligible. All decisions regarding inclusion or exclusion shall be made consistent with this section and the procedures set forth in section B of this

New Hampshire School Boards Association - Sample Policy EBCG. We do not have this policy.

12-8-2020 Policy Committee to act on GEA feedback

1-4-2021 School Board – second reading

policy. There shall be no discrimination against a student infected with a communicable disease.

2. Employees.

It is the policy of the School Board that employees (which for the purposes of this policy will include individual consultants/contractors, and volunteers) with communicable diseases not be excluded from attending to their customary employment and duties so long as they are physically able to perform tasks assigned to them and so long as their employment results in a situation where the risk of transmission of illness to students or other employees of the District, or hazard to themselves, is negligible. There shall be no discrimination in employment against a person infected with a communicable disease.

3. Special Circumstances and Conditions.

The School Board recognizes that some students or employees, because of age, disability or other special conditions, may pose greater risks for the transmission of communicable diseases than other persons infected with the same illness. Examples include children who display biting behavior and students and employees who are unable to control their body fluids or have uncovered wounds. These conditions need to be taken into account and considered in assessing the risk of transmission of the disease and the resulting effect upon the educational program of the student or employment of the employee.

In the instance of diseases causing suppressed immunity, attendance may be denied to a child with suppressed immunity in order to protect the welfare of the child with suppressed immunity when others in the school have an infectious disease which, although not normally life threatening, could be life threatening to the child with suppressed immunity.

B. PROCEDURES WHEN COMMUNICABLE DISEASE IS SUSPECTED:

1. **Reporting.** School District employees, including contracted individuals and/or agencies who are performing contracted responsibilities for the School District, and who become aware of a communicable disease or other potentially serious health problem regarding themselves, or of students or other employees, unless prohibited by statutory confidentiality, they will report it to the school nurse, or building Principal/designee.
2. **Response.** The health risk to others in the school district environment from the presence of a student or employee with a communicable disease shall be determined on a case-by-case basis. In all cases in which the school nurse, or other person designated by the Superintendent, becomes aware that a student or employee of the School District has contracted a communicable disease of the kind in section A of this policy, s/he will take the following steps:

1-4-2021 School Board – second reading

- a. The parent/guardian(s) of a student will be contacted in order to discuss the situation and determine whatever facts are available; the same information will be communicated promptly among the Superintendent/designee, school nurse and Principal/designee.
- b. Upon receiving written consent from the parent(s) or guardian of a student or, in the case of an employee, the employee or his/her health care agent (i.e., adult to whom authority to make health care decisions is delegated under an advance directive meeting the requirements of RSA 137-J:20), the school nurse/Superintendent's designee will attempt to confer with the treating physician, if any, in order to determine any significant medical facts concerning the diagnosis of the disease or factors affecting the possible transmission of the disease.
- c. Notify and consult with the health care professionals knowledgeable about the particular disease. Following such consultation, the school nurse, Superintendent or his/her designee, shall determine the immediate, short-term action to be taken relative to educational placement of the student or work assignment for the employee.
- d. When a communicable disease of the kind identified in section A of this policy is suspected or confirmed in an individual, the school nurse shall consult with the Superintendent or designee and appropriate public health officials, to determine whether a student or employee shall be excluded from school or from attending to their customary employment, and whether additional measures are required to protect other members of the school population. Factors specific to individuals, such as biting behaviors, lack of control of body fluids, existence of uncovered wounds or other medically identifiable conditions may also be considered. Recommendations regarding the least restrictive educational placement for a student or continued attendance at work for an employee may be sought on a case by case basis.

In addition to the information obtained in steps a-c, decisions to exclude shall consider criteria from NHDHHS Bureau of Infectious Disease included in its publication "*When Children Should be Excluded or Dismissed from a Childcare Setting*", or the American Academy of Pediatrics' "*Red Book: Report of the Committee on Infectious Diseases*", or other general or specific guidance from the NHDHHS or the United States Centers for Disease Control.

1-4-2021 School Board – second reading

- i. Decisions regarding students. **Unless the school nurse is unavailable,** The ultimate decision to exclude a child from school under this Policy due to a contagious or communicable illness shall be made by the school nurse after consulting with the Superintendent/designee and Principal/designee.

If the school nurse is unavailable, a decision to exclude shall be made by the Superintendent/designee.

GEA Feedback: Is “Unless the school nurse is unavailable” needed as it is stated later in the paragraph?

The Policy Committee removed “Unless the school nurse is unavailable”

If the student is a student with an IEP, 504 plan, or other such individualized learning plan, then decisions regarding alternative settings shall be made according to the applicable laws, regulations and policies.

Students who are aggrieved by the education plan determinations may appeal said determinations pursuant to state and federal special education law if the infected student is eligible for or claims that s/he is eligible for special education or special education and related services. Excluded students who do not claim that they are eligible for special education or special education and related services, but who are aggrieved by the Superintendent's determinations, may appeal said determinations to the Board.

- ii. Decisions regarding employees. Determinations regarding exclusion or reassignment of employees shall be made by the Superintendent/designee. Absent significant risk to the employee or risk of transmission to students or other employees, the Superintendent shall not alter the job assignment of the infected person. Volunteers are subject to any directives issued by the administration, as are contractors and consultants, subject to the terms of their respective agreements.

If the Superintendent/designee, after taking the steps above, determines that there is a medically recognized risk of transmission of disease in the School setting or that a significant health problem restricts the infected person's ability to work, or presents a substantial hazard to the employee, the Superintendent/designee shall, if necessary, develop an individually tailored plan to accommodate the staff member if possible. Additional persons may be consulted if necessary for gaining additional information,

1-4-2021 School Board – second reading

but the infected person must approve of the notification of any additional persons who are informed of the infected person's identity. The Superintendent/designee may consult with legal counsel to ensure that any official action is consistent with state and federal law. If an individually tailored plan is necessary, said plan should be medically, legally, educationally and ethically sound.

- iii. Testing, Social Distancing and Other Extraordinary Measures. Some infectious diseases, viruses, etc., may be so dangerous and or the risk of casual transmission so great, that effective response will require broader measures. Based upon specific recommendations of local, state and/or federal health authorities, the Superintendent is authorized to implement such additional, extraordinary emergency measures as may be necessary and appropriate to address the health risk: e.g., school closure, population exclusion (stay-at-home type instructions), mandatory screenings, mandatory use of personal protective equipment (PPE's), social distancing orders, administrative leaves or temporary adjustments in duties. These provisions are intended to complement, not replace any provisions of Board policy *Pandemic/Epidemic Emergencies*. Such measures shall be taken with prior notice to the Board, if practicable, or as soon as possible thereafter. The Board Chair or Superintendent shall promptly schedule a special or emergency meeting of the School Board.

3. Practices to Minimize Contamination in Schools.

Good hygiene practices as recommended by local, county and state health authorities are to be followed at all times when handling blood or other body fluids of any student or employee. Parents and employees are not generally required to advise the school if their child has a communicable disease. (Some exception may exist under specific legislation or Executive/emergency orders, in which, such legislation or Executive orders shall supersede this policy to the extent necessary to remove any conflict.) Because the District may not rely on self-reporting, it is appropriate to adopt procedures for the handling of body fluids from any child or employee. This also eliminates the need to notify all maintenance, transportation and building personnel if the District becomes aware of a student or employee with communicable diseases. It is recommended the following procedures be used on a routine basis when blood or any other body fluids including vomitus and fecal or urinary incontinence are involved.

- a. Gloves should be worn when cleaning up any body fluids.

New Hampshire School Boards Association - Sample Policy EBCG. We do not have this policy.

1-4-2021 School Board – second reading

- b. Spills should be cleaned up, the affected area washed with soap and water and disinfected with bleach (one part bleach to ten parts water), or another disinfectant.
- c. All disposable materials, including gloves and diapers, should be discarded into a plastic bag before discarding in a conventional trash system. The mop should also be disinfected with the bleach solution described in B above.
- d. Toys and other personal non-disposable items should be cleaned with soap and water followed by disinfection with the bleach solution before passing to another person. A normal laundry cycle is adequate for other non-disposable items.
- e. Persons involved in the clean-up should wash their hands afterward.

Additional precautions may be recommended or required in certain instances (e.g., social distancing, masks, etc.).

4. Confidentiality and Data Privacy.

Public concern regarding communicable diseases is neither an excuse nor defense for the violation of data privacy rights of students or employees who have or are rumored to have such illnesses.

- A. Personally identifiable health information regarding students is private data and is not to be disseminated to the public or to staff without the strict observance of student privacy rights.
- B. Personally identifiable health data and information regarding employees is private data and may not be released to the public nor to fellow employees without strict observance of privacy rights of public employees.
- C. Parents of other children attending the school, or other school employees, may only be notified of a possible exposure to a communicable disease to the extent permitted, or required, under applicable law, regulations or Executive order. In general, such information will not identify the particular student or employee who has the disease.
- D. Any District employee who violates the confidentiality provisions of this policy shall be subject to discipline. A confidentiality breached by an independent contractor/consultant, could result in termination of the contract for cause.

New Hampshire School Boards Association - Sample Policy EBCG. We do not have this policy.

5. **Staff and Student Education.**

The School Board recognizes that the education of its **residents**, staff, and students regarding the risks involved in the spread of infectious diseases in the school setting will help to minimize the risk of transmission to other students and employees while protecting the rights of infected students and employees.

GEA Feedback: *There is reference to the education of residents in the opening sentence. Should “residents” be added to the heading?*

The Policy Committee removed the word “residents”

- A. All school district employees should receive instruction regarding appropriate hygienic practices for use in school settings, precautions to be employed where contagious diseases may be encountered and community resources for referral and information.
- B. Any information provided as part of a student’s instruction pertaining to sexually transmitted diseases shall comply with Board policy IHAM.

6. **Implementation.**

The Superintendent is authorized to implement this policy through procedures, or administrative directives which s/he deems necessary or appropriate.

HIV/AIDS

Preamble. Human Immunodeficiency Virus (HIV) progressively destroys the body's ability to fight infections and certain cancers. The term acquired immunodeficiency syndrome (AIDS) is used to mean the later stages of an HIV infection. To assist the District and infected persons, the District adopts the following policy.

I. General Principles:

(A) HIV is not spread by casual, everyday contact. Therefore, absent a serious secondary infection that may be transmitted to others or a significant health problem that restricts the infected person's ability to attend School, a student who is infected with HIV or AIDS shall attend the School and classroom to which he or she would be assigned, and shall receive the rights, privileges and services to which he or she would be entitled if not infected, free of physical and verbal harassment.

(B) There shall be no discrimination in employment against a person infected with HIV or AIDS based solely upon said infection. No District employee shall be terminated, non-renewed, demoted, suspended, transferred or subjected to adverse action based solely upon his/her infection with HIV or AIDS, or the perception that he or she is so infected. However, the District may take whatever action is appropriate as to an employee who, despite reasonable accommodation, is unable to perform his/her duties due to an illness, including an illness related to HIV or AIDS.

(C) The School District shall provide a sanitary environment and shall establish procedures for handling bodily fluids, pursuant to Section V.

(D) The District shall administer a program of education about HIV or AIDS for students, their families, and School District employees to ensure that they are informed about the following:

- (1) The nature and effects of HIV including current information about how it is transmitted and prevented in ways that are scientifically, legally, and educationally sound;
- (2) District policies and procedures relating to employees and students with diseases such as HIV or AIDS;
- (3) Resources within the School District and elsewhere for obtaining additional information or assistance; and
- (4) Procedures to prevent the spread of communicable diseases at School.

II. Evaluation of Infected Students and Staff

(A) HIV is not transmitted casually. Accordingly, infection with HIV or AIDS is not, by

itself, sufficient reason to remove a student or staff member from the School. When the Superintendent has been notified that a student or staff member is infected with AIDS, the Superintendent shall act appropriately to ensure the safety of persons in the School setting and to plan to support the infected person.

(B) When the District learns that a student is infected with HIV or AIDS, the appropriate procedures under State and Federal Law with regard to evaluation and educational programming shall be followed if the student is or may be educationally handicapped.

(C) (1) When notified that an employee is infected with HIV or AIDS, the Superintendent shall determine whether the infected person has a significant health problem that will restrict his/her ability to work and shall determine whether the infected person has a secondary infection (e.g., tuberculosis) that poses a medically recognized risk of transmission of disease. The Superintendent shall make this determination by consulting with the infected person's physician and the infected person.

The Superintendent also may consult with public health officials and other persons, subject to the confidentiality provisions in this policy. The Superintendent shall consider methods in which the School District may anticipate and meet the needs of persons infected with HIV or AIDS.

(2) Absent a secondary infection, which creates a medically recognized risk of transmission of disease, or a significant health problem that restricts the infected person's ability to work, the Superintendent shall not alter the job assignment of the infected person. However, the Superintendent shall periodically review the case with the persons described in Section II(C) (1).

(3) If the Superintendent determines that a secondary infection poses a medically recognized risk of transmission of disease in the School setting or that a significant health problem restricts the infected person's ability to work, the Superintendent shall consult with the persons described in Section II(C) (1). After said consultation, the Superintendent shall, if necessary, develop an individually tailored plan to accommodate the staff member if possible. Additional persons may be consulted if necessary for gaining additional information, but the infected person must approve of the notification of any additional persons who are informed of the infected person's identity. The Superintendent may consult with legal counsel to ensure that any official action is consistent with state and federal law. If an individually tailored plan is necessary, said plan should be medically, legally, educationally and ethically sound.

(D) Infected students who are aggrieved by the education plan determinations may appeal said determinations pursuant to state and federal special education law if the infected student is eligible for or claims that he is eligible for special education or special education and related services. Infected persons who do not claim that they are eligible for special education or special education and related services, but who are aggrieved by the Superintendent's determinations, may appeal said determinations to the Board.

(E) Confidentiality shall be observed throughout the foregoing process.

III. Confidentiality

(A) The identity of a student or staff member who is infected with HIV or AIDS may be disclosed to those persons who determine whether the infected person has a secondary infection that poses a medically recognized risk of transmission of disease in the School setting or whether a significant health problem will restrict the infected person's ability to work or attend class. These persons include:

(1) The Superintendent or a person designated by the Superintendent to be responsible for the determination, or, in the case of a student who is identified as educationally handicapped or who is claimed or believed to be educationally handicapped, the special services team.

(2) The physician of the infected person.

(3) Public health officials, to the extent that their knowledge of the infected person's identity is necessary.

(B) The persons listed in Section III (A) (1) - (2) and the infected person (or his/her parents or guardians) shall determine whether additional persons to know the identity of an infected person. The identity of an infected person shall not be disclosed to persons who are not listed in Section III (A) without the consent of the infected person, or the infected person's parents or guardians. The persons to whom the infected person's identity may be disclosed with the aforementioned consent include the School nurse, the School Principal or other persons necessary to protect the health of the infected person or to evaluate and monitor the case.

(C) All staff members who know the identity of persons infected with HIV or AIDS shall treat said information as confidential. No information will be divulged directly or indirectly to any individuals or groups, except as noted in Section III (A) - (B). All medical information and written documentation of discussions, telephone conversations, proceedings, and meetings concerning the HIV or AIDS infection shall be maintained in a locked file. Access to said file shall be granted only to those persons who have the written consent of the infect person or his/her parents or guardians. The names of infected persons shall not be used in documents, except when essential. No document containing the name or other information that reveals the identity of an infected person may be shared with any person for any purposes without the consent of the infected person or the infected person's parents or guardians. Any School staff member who violates the confidentiality provisions of Section III shall be subject to discipline. Test results and medical records shall be disclosed only with the consent of the infected person (or that person's parent if he is a minor), pursuant to a subpoena or order of a court or administrative agency, or otherwise in accordance with law.

IV. Testing

Mandatory testing for communicable diseases that are not spread by casual, everyday contact (e.g., HIV or AIDS) shall not be a condition for School entry or attendance, or for employment or continued employment.

V. Control of Infections

- (A) HIV cannot penetrate unbroken skin, and there is no evidence that HIV has been transmitted through contact with vomit, nasal discharge, saliva, urine, or feces. However, said body fluids commonly transmit infections such as Hepatitis, colds and flu. Accordingly, direct skin contact with body fluids should be avoided whenever possible.
- (B) Staff members shall follow the universal precautions in handling body fluids in the Schools.
- (C) The District shall cooperate with local, state and federal health agencies in controlling infections.
- (D) If a person in a school setting has been exposed to blood-to-blood contact, the district should counsel the person to seek medical testing and attention.

VI. Health Education

The Board recognizes that HIV/AIDS education should be integrated into the health and family life curriculum, but may also be applied to other curriculum areas.

The District's HIV/AIDS education program must address, at a minimum, the nature, transmission, prevention, and effects of the disease. The program shall be provided in a sequential manner in all grades, taking into consideration the age and maturity of the pupils and the subject matter of the course.

Development of the program should take into account the instructional needs of all pupils in the District and be scientifically, legally, and educationally sound.

The Superintendent shall ensure that the information presented as a part of the HIV/AIDS program is articulated in such a way that transition from grade to grade in the elementary Schools and from elementary to secondary approaches to the material will be appropriate for all pupils.

The Superintendent shall ensure that all staff involved in teaching the HIV/AIDS education program are properly certified and adequately prepared to teach the material. As necessary, appropriate staff training shall be provided. All employees shall have training in Universal Precautions.
